

FABRICE BODSON

CYBERSECURITY CONSULTANT

Passionate about and specializing in information systems and IT infrastructure security, I am committed to the continuous development of my skills to effectively contribute to the protection and performance of client environments. Results-oriented and focused on quality of service, I support organizations with rigor and dedication to address their security challenges. Dynamic, with strong interpersonal skills and a keen capacity for learning, I thrive in demanding, high-value environments.

EXPERIENCE

PWC BELGIUM - CONSULTANT

Employee | Offensive Security | September 2025 - Today

I have conducted numerous penetration tests on web applications and infrastructure for international clients in the public and financial sectors. I collaborated on Docker deployments using Terraform in a DevOps perspective. I am also part of the Infrastructure Lab team for client projects where we use Azure to manage servers.

KPMG BELGIUM - ADVISORY

Employee | GRC | September 2024 - August 2025

I have participated in various projects such as the design of ISO27001 roadmaps, the development of a control compliance framework, and I have participated in various DORA projects. I have worked for clients in the public and financial sectors.

KPMG BELGIUM - ADVISORY

Internship | GRC | February 2024 - April 2024

The internship consisted of Threat Intelligence on threats in the financial sector regarding cryptocurrencies and blockchain.

FAYMONVILLE AG

Internship | February 2022 - May 2022

Implementation of a DMZ and strengthening of MFA authentication for VPN access. The technologies used are the Fortinet firewall and VPN solution, as well as Microsoft Azure AD.
